- › Tracking systems

Blue Water Singapore warehouse situated at 20 Gul way spans 10,000 square metres of indoor and 10,000 sqm of outdoor space. The facility is equipped to handle any scale of logistical needs and cargo with a special focus on oil and gas equipment and marine spares.

Under the Zero-GST Warehouse Scheme, Blue Water offers GST-suspended storage for imported non-dutiable goods, with full accountability and customs declaration compliance for all in- and outbound cargo via TradeNet.

Stringent HSSEQ Standards

Staffed with 10 experienced warehouse assistants and supervisors, we provide short and long-term storage solutions that complies with the industry's most stringent HSSEQ standards without depending on third parties in

the world's busiest transshipment hub.

Heavy Duty Racking System

The indoor warehouse features a 488-pallet heavy duty racking solution, capable of sustaining a maximum load of 3 tonnes per rack, maximising storage capacities.

Specialised Equipment Availability

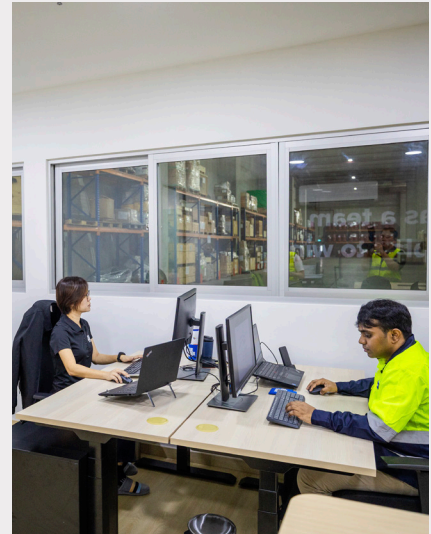

In addition, specialised operations in the warehouse are supported by a range of heavy-duty forklifts, ranging from 3 to 16-tonne electric forklifts, as well as a 45-tonne reach stacker, ensuring seamless handling of goods of all sizes and weights. We can store, shift and pick and pack cargo in a reliable and sustainable way with the newly added EV forklifts, adding additional value to our services," says Kevin Sandhu, Head of 3PL Services Blue

Water Asia.

"Customers trust us for our professionalism and carrying out warehouse operations to the highest standards. We partner them and provide flexibility they need and real time traceability of their cargo through the most advanced Warehouse Management Systems. Safe and secure storage is a crucial part of the value we bring to the supply chain and we provide top-notch solutions for all your logistical needs," assures Florian Pinz, Managing Director Energy Ports & Projects, Singapore & Malaysia.
