Global **Environmental** Policy

REV6 / 2026.06.26 / SVSV - ROHO/SANP

Blue Water Shipping is certified in accordance with ISO 14001 and therefore we focus on continously reducing environmental impact on the basis of defined environmental targets.

We will ensure minimal impact on the environment by

- Working target-oriented towards minimising environmental impact from day to day business
- Influencing and motivating customers and suppliers to prioritise environmentally friendly transport solutions
- Working to be at the forefront of environmental initiatives within the business, and build up knowledge and competencies to benefit our customers and their environmental image
- Ensuring that existing legislation is observed
- Emphasising and determining significant environmental aspects and targeting the effort to reduce these

To achieve this we will

- As a minimum ensure compliance with international and local legislation. As a minimum ensure compliance with international and local legislation and other specific commitment(s) relevant to the context
- Protect the environment and prevent pollution
- Implement a documented and certified environmental control according to ISO 14001:2015
- Continously carry out measures and follow up on environmental impacts
- Set up goals for improvement and plans of action as well as systematic follow-ups on performance and results
- Supervise the efficiency and adequacy of the environmental control system in relation to objectives and goals for improvement through internal audits and management review (performance review)
- Prepare plans for environmental aspects in connections with projects or by client demand as well as documenting and controlling the process according to these

Near-term targets

Blue Water Shipping commits to reduce absolute scope 1 and 2 GHG emissions 46.2% by 2031 from a 2022 base year. Blue Water Shipping also commits to reduce scope 3 GHG emissions 51.6% per gram CO_2/ton kilometer within the same timeframe.
